

METRO ENDOCRINE & PATHOLOGY DIAGNOSTICS

Clinical Biochemistry & Hormone Assay Division

1200 Innovation Parkway, Suite 400 | Tel: (555) 782-1100

Lab Order ID: THY-2026-4402

Sample Date: 2026-08-14

Patient Name: David Miller

Age/Gender: 42Y / Male

Referred By: Dr. Rebecca Thorne, MD

Specimen: Serum

TEST PARAMETER	OBSERVED VALUE	UNITS	REFERENCE RANGE
TSH (Thyroid Stimulating Hormone)	7.80 [HIGH]	uIU/mL	0.40 - 4.20
Free Thyroxine (FT4)	0.72 [LOW]	ng/dL	0.80 - 1.80
Total Triiodothyronine (T3)	82.0 [NORMAL]	ng/dL	80.0 - 200.0
Anti-TPO Antibodies	64.0 [HIGH]	IU/mL	< 35.0

ENDOCRINOLOGIST CLINICAL INTERPRETATION:

- ▣ Elevated TSH with reduced Free T4 confirms Primary Hypothyroidism.
- ▣ Elevated Anti-TPO titers suggest autoimmune Hashimoto's Thyroiditis.
- ▣ Recommended Treatment: Initiate Levothyroxine Sodium 75 mcg daily.
- ▣ Follow-up: Repeat TSH and FT4 panel in 6-8 weeks for titration.

Dr. Nathan Cole, MD
Consultant Clinical Biochemist
